Product Launch

The Vagus Nerve

## MERRY CHRISTMAS & HAPPY HOLIDAYS

From everyone at Vielight:

As the festive season unfolds, may your days be filled with joy and warmth. Here's to celebrating the beauty of the season and the promise of new beginnings.

We extend our heartfelt gratitude to our supporters and collaborators for an impactful year marked by groundbreaking scientific discoveries and new partnerships. Anticipating an exhilarating 2024 ahead!

Spread the light with your loved ones this Christmas! The **Vielight 810-655** is now 10% off until December 31st.

 **VIELIGHT**

## INTRODUCING THE VIELIGHT VAGUS

After several years of engineering, we are honored to launch our **Vielight Vagus** device.

While vagus nerve stimulation is commonly conducted through electrical stimulation, the Vielight Vagus offers non-invasive stimulation based on photobiomodulation (PBM).

The Vielight Vagus is patented and is the world's only PBM device specifically designed for vagus nerve stimulation.

The vagus nerve plays a pivotal role in regulating fundamental bodily functions through its direct link between the brain and the gut.

The Vielight Vagus enhances this vital nerve, improving the brain-gut connection and theoretically, improving brain and systemic photobiomodulation outcomes.

The Vagus is now available here: [Link](#)

## THE VAGUS NERVE

Stimulation of the vagus nerve has been found to have a profound impact on mental health. Techniques like deep breathing, meditation, and certain types of yoga can activate the vagus nerve, leading to a decrease in stress and anxiety.
